COMMON ISSUES & SOLUTIONS

■ **I can't find my download files**

■ Go to Etsy.com → top-right menu → 'Purchases and reviews' → find this order → 'Download files'. Check your spam folder for the confirmation email.

■ **The Excel file won't open**

■ Ensure you have Microsoft Excel 2016 or later. The file is NOT compatible with Apple Numbers or Google Sheets opened directly (upload via Google Drive instead).

■ **My GoodNotes PDF tabs don't work as hyperlinks**

■ Make sure you imported as a 'New Notebook' not a single page. The hyperlinks work in GoodNotes 5+ and any PDF viewer that supports links (PDF Expert, etc.).

■ **The printable PDF looks blurry when printed**

■ You may have scaled the page during printing. Set 'Page sizing' to 'Actual size' in your print dialog, not 'Fit to page' (which can compress the resolution).

■ **I accidentally deleted content from the Excel file**

■ Close WITHOUT saving, then re-download from Etsy. Your Etsy purchase gives you unlimited downloads — the link never expires.

■ **The Google Sheets formulas show errors**

■ After importing to Google Sheets, some cell references may need updating. Contact us via Etsy message and we'll help you fix it within 24 hours.

■ **I downloaded the wrong size (Letter vs A4)**

■ Both Letter and A4 versions are included in your download. Check your Etsy downloads page for the second file.
